Being a **PhD student of Food Biotechnology at Ferdowsi University of Mashhad**, Iran, I have a B.S. in Food Science and Technology and a M.S. in Food Biotechnology at Isfahan University of Technology, Iran. I am interested in expanding on my researches in the field of Cross Protection in Probiotics, Functional Foods and Food Omics. Among my work and research experiences, a five-year work as a technical manager in Isfahan Pegah ISIRI Accredited Lab, an acclaimed patent, namely "Increasing Viability of Native Probiotic *L. plantarum* Using Sub-lethal Stresses", which was selected as the superior invention in the Iranian National Inventions Conference, winning its award, published a book titled "Nutritional Therapy" and teaching undergraduate students several courses including Food Plant Designing, Sugar Processing Technology, Food Microbiology, Dairy Technology as well as Fundamental of Human Nutrition are the most remarkable ones.
